Work Experience

Infoshore | Python Developer Intern

06/2025 – 07/2025

- Designed a modular Python automation framework orchestrating 5+ scripts for data cleaning, report generation, and email notifications via SMTP; reduced analyst manual effort by 30%, enabling daily report turnaround vs. weekly prior.
- Transformed a reusable ETL pipeline in Python (Pandas/NumPy) processing 20,000+ records with configurable cleaning rules, reducing data preparation time from 4 hours to 35 minutes across 3 internal reporting workflows.

Kistechsoftware | Software Developer Intern

06/2024 – 07/2024

- Devised and deployed a full-stack web app (Flask + Firebase) featuring OAuth 2.0 MFA, real-time Firestore data sync, and session management; served 5,000+ users with zero reported auth breaches during deployment period.
- Formulated a secure multi-factor authentication system utilizing OAuth 2.0, enhancing application security and mitigating unauthorized access attempts for over 5,000+ users.

Projects

SyncForge | GitHub

06/2026

- Built a collaborative coding platform using React.js and Socket.io, supporting real-time code synchronization, live chat, and room-based collaboration with 3 permission levels.
- Developed 20+ REST APIs using Node.js, Express.js, and MongoDB, implementing JWT/Google OAuth authentication and project persistence across 5+ core entities.
- Integrated Monaco Editor and Judge0 API to support execution of 4 programming languages with compilation, runtime diagnostics, and custom input handling.

HireBlind – AI-Powered Anonymous Resume Screening System | GitHub

04/2026

- Architected a PII anonymization engine using spaCy NER + custom regex patterns to redact 6+ entity types across 50+ resumes with 94%+ detection accuracy; designed as a pre-processing middleware layer in the Node.js API pipeline.
- Established an AI-driven ranking engine using TF-IDF/NLP similarity to score candidates on 3 parameters, reducing screening effort by 30%.
- Generated explainable AI outputs with 3+ justification tags per candidate and audit logs for each decision, ensuring transparency and compliance with AI fairness principles.
- Designed 10+ RESTful APIs in Node.js/Express with JWT-based RBAC (Admin/Recruiter roles), supporting bulk resume uploads (5+ files via multipart/form-data) with input validation middleware; average response time <200ms on local benchmarks.

WhatsApp Chat & Sentiment Insight Engine | Demo Link

08/2025

- Processed 10,000+ chat messages using NLP to generate real-time insights and interactive visualizations.
- Orchestrated transformer-based sentiment and emotion classification using DistilBERT and XLM-RoBERTa, achieving 90% accuracy for multilingual (English + Hinglish) conversation analysis.
- Engineered a fault-tolerant preprocessing pipeline in Python handling 5+ WhatsApp timestamp formats and ZIP extraction using regex-based format detection; pipeline processes 10,000+ messages in <8 seconds end-to-end.

Technical Skills

Core Concepts : Data Structures & Algorithms, OOP, REST APIs, Operating Systems, Computer Networks, DBMS

Languages : C++, Python, JavaScript, SQL

Frameworks : Node.js, Express.js, Flask, React, Socket.io

Databases : MongoDB, MySQL, Firebase

ML & Data : Pandas, NumPy, Matplotlib, NLP (Transformers)

Tools : Git, GitHub, Postman, Jupyter Notebook

Education

B.Tech in Computer Science, SKIT Jaipur

08/2023 – Present

CGPA: 8.33

Class XII (CBSE), Virasat Vidyapeeth School

05/2022

Percentage: 88.33%

Class X (CBSE), Virasat Vidyapeeth School

05/2020

Percentage: 89.6%

Achievements & Extracurriculars

- Solved **550+ Data Structures and Algorithms problems** across platforms including LeetCode, CodeStudio, and GeeksforGeeks, strengthening algorithmic thinking in arrays, trees, graphs, and DP problems.
- Achieved **3rd position among 25+ teams** in Coplur Work Readiness Program, demonstrating algorithmic thinking and development skills across quiz, hackathon, and technical interview rounds.
- Earned **26+ coding badges and certifications** demonstrating proficiency in C++, OOP, and Data Structures & Algorithms.
- Spearheaded a national-level inter-college hackathon with **300+ participants**, managing operations, technical workflows, and execution.
